

Shape Worksheets (Compare & Classify Polygons)

Name _____

Date _____

1. Cut out all the polygons (M–X) in the template. Then use the polygons to complete the following chart.

Attribute	List the polygons' letters from the group.	Sketch 1 polygon from the group.
<i>Example:</i> 3 Sides	<i>Polygons: Y, Z</i>	
All Sides are Equal	Polygons:	
All Sides are Not Equal	Polygons:	
At Least 1 Right Angle	Polygons:	
At Least 1 Set of Parallel Sides	Polygons:

Shape Worksheets (Compare & Classify Polygons)

2. Compare Polygon M and Polygon X. What is the same? What is different?

They both have 8 sides, so they are both octagons. But Polygon M has all equal sides and Polygon X has sides that are not all equal.

3. Jenny says, "Polygon N, Polygon R, and Polygon S are all regular quadrilaterals!" Is she correct? Why or why not?

No, Jenny is not correct. A regular quadrilateral has 4 equal sides and 4 equal angles. Only Polygon S is a regular quadrilateral.

4. "I have six equal sides and six equal angles. I have three sets of parallel lines. I have no right angles."

- a. Write the letter and the name of the polygon described above.

Polygon U is a regular hexagon.

- b. Estimate to draw the same polygon, but with no equal sides.
