

Mixed Numbers to Improper Fractions

Convert the following mixed numbers to improper fractions.

$$4\frac{3}{4} = \underline{\quad}$$

$$3\frac{1}{2} = \underline{\quad}$$

$$5\frac{3}{5} = \underline{\quad}$$

$$4\frac{1}{2} = \underline{\quad}$$

$$3\frac{1}{4} = \underline{\quad}$$

$$5\frac{3}{4} = \underline{\quad}$$

$$2\frac{1}{3} = \underline{\quad}$$

$$7\frac{2}{9} = \underline{\quad}$$

$$8\frac{3}{7} = \underline{\quad}$$

$$2\frac{3}{5} = \underline{\quad}$$

$$7\frac{1}{10} = \underline{\quad}$$

$$4\frac{2}{3} = \underline{\quad}$$

$$9\frac{1}{3} = \underline{\quad}$$

$$7\frac{1}{3} = \underline{\quad}$$

$$4\frac{8}{9} = \underline{\quad}$$

$$9\frac{3}{4} = \underline{\quad}$$

$$5\frac{2}{3} = \underline{\quad}$$

$$3\frac{2}{5} = \underline{\quad}$$

$$5\frac{1}{8} = \underline{\quad}$$

$$6\frac{1}{2} = \underline{\quad}$$

Mixed Numbers to Improper Fractions

Convert the following mixed numbers to improper fractions.

$$4\frac{3}{4} = \frac{19}{4}$$

$$3\frac{1}{2} = \frac{7}{2}$$

$$5\frac{3}{5} = \frac{28}{5}$$

$$4\frac{1}{2} = \frac{9}{2}$$

$$3\frac{1}{4} = \frac{13}{4}$$

$$5\frac{3}{4} = \frac{23}{4}$$

$$2\frac{1}{3} = \frac{7}{3}$$

$$7\frac{2}{9} = \frac{65}{9}$$

$$8\frac{3}{7} = \frac{59}{7}$$

$$2\frac{3}{5} = \frac{13}{5}$$

$$7\frac{1}{10} = \frac{71}{10}$$

$$4\frac{2}{3} = \frac{14}{3}$$

$$9\frac{1}{3} = \frac{28}{3}$$

$$7\frac{1}{3} = \frac{22}{3}$$

$$4\frac{8}{9} = \frac{44}{9}$$

$$9\frac{3}{4} = \frac{39}{4}$$

$$5\frac{2}{3} = \frac{17}{3}$$

$$3\frac{2}{5} = \frac{17}{5}$$

$$5\frac{1}{8} = \frac{41}{8}$$

$$6\frac{1}{2} = \frac{13}{2}$$
