

Subtract Mixed Numbers
(unlike denominators, with grouping)

$$5\frac{1}{4} - 1\frac{5}{10} =$$

$$5\frac{2}{3} - 3\frac{9}{10} =$$

$$6\frac{1}{3} - 1\frac{1}{2} =$$

$$7\frac{1}{3} - 4\frac{2}{5} =$$

$$6\frac{1}{2} - 3\frac{3}{5} =$$

$$7\frac{1}{2} - 4\frac{3}{4} =$$

$$7\frac{4}{10} - 1\frac{2}{3} =$$

$$8\frac{2}{5} - 3\frac{3}{4} =$$

Subtract Mixed Numbers
(unlike denominators, with grouping)

$$5\frac{1}{4} - 1\frac{5}{10} = 4\overset{25}{\cancel{5}\frac{5}{20}} - 1\frac{10}{20} = 3\frac{15}{20} = 3\frac{3}{4}$$

$$5\frac{2}{3} - 3\frac{9}{10} = 4\overset{50}{\cancel{5}\frac{20}{30}} - 3\frac{27}{30} = 1\frac{23}{30}$$

$$6\frac{1}{3} - 1\frac{1}{2} = 5\overset{8}{\cancel{6}\frac{2}{6}} - 1\frac{3}{6} = 4\frac{5}{6}$$

$$7\frac{1}{3} - 4\frac{2}{5} = 6\overset{20}{\cancel{7}\frac{5}{15}} - 4\frac{6}{15} = 2\frac{14}{15}$$

$$6\frac{1}{2} - 3\frac{3}{5} = 5\overset{15}{\cancel{6}\frac{5}{10}} - 3\frac{6}{10} = 2\frac{9}{10}$$

$$7\frac{1}{2} - 4\frac{3}{4} = 6\overset{6}{\cancel{7}\frac{2}{4}} - 4\frac{3}{4} = 2\frac{3}{4}$$

$$7\frac{4}{10} - 1\frac{2}{3} = 6\overset{42}{\cancel{7}\frac{12}{30}} - 1\frac{20}{30} = 5\frac{22}{30} = 5\frac{11}{15}$$

$$8\frac{2}{5} - 3\frac{3}{4} = 7\overset{28}{\cancel{8}\frac{8}{20}} - 3\frac{15}{20} = 4\frac{13}{20}$$
