2. Seven children share 28 silly bands equally.

- a. How many silly bands does each child get?
- b. How many silly bands do 3 children get?

3rd Grade Word Problems (Multiply & Divide)

1. Ted buys 3 books and a magazine at the book store. Each book costs \$8. A magazine costs \$4.

- a) What is the total cost of the books?

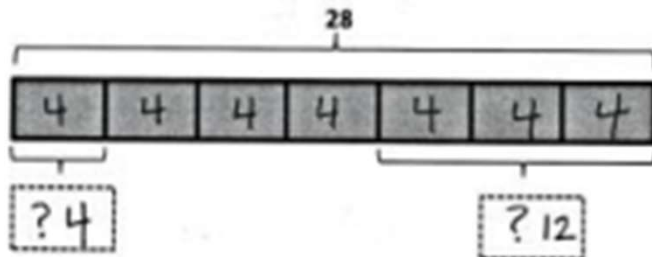

$$3 \times \$8 = \$24$$

- b) How much does Ted spend altogether?

$$\$24 + \$4 = \$28$$

Ted spends \$28 altogether.

-
2. Seven children share 28 silly bands equally.

- a) How many silly bands does each child get?

$$28 \div 7 = 4$$

- b) How many silly bands do 3 children get?

$$3 \times 4 = 12$$

3 children get 12 silly bands
